

WHAT'S THE WORKLOAD OF THE SEQUIM POLICE DEPARTMENT?

In 2007, the Department experienced a 3% increase in total incidents handled, which rose to **13,457** versus the previous year total of 13,057. Within the total number of incidents handled, the Department classifies activity into either an Incident that generates a written police report or as a Quick Call. Incidents are shown above in red and involve a completed police investigation or arrest. Quick calls are shown in blue above and involve a combination of increased officer productivity in the way of self initiated incidents and traffic stops as well as citizen calls that could be handled without the need for actual enforcement such as an arrest (these are incidents that required a police response such as disturbances, suspicious circumstances, traffic stops and a host of other situations that the people called in or which an officer initiated).

Incidents dropped by 3% from the 2006 level of 6,373 to 6,199 in 2007. Quick calls rose 9% from the 2006 level of 6,684 to 7,268 in 2007.

Serious Crime Trend with 2008 Estimate

Violent/Serious Crime for 2007 showed significant decrease – in part as a result of proactive investigations by Detectives and aggressive patrol activities and enforcement.
