WEST ALDER STREET PROJECT

This is an update on the construction of West Alder Street between North Sequim Avenue and North 5th Avenue.

Construction start date is **APRIL 23**, with a completion date of **June 15, 2003**

Proposed Improvements:

The contractors will be furnishing and installing approximately 1,950 feet of new water line and an asphalt overlay. The old 2 inch water line will be replaced with a new 8 inch water line, providing the customer with better water service and fire flow. The street will be paved to a new width of 40 feet including parking areas, with increased turning radii at connecting streets. Pavement markings for two lane traffic and new street signs will be installed. Each segment or block will be closed to through traffic between the hours of 7:00 am and 7:00 pm Monday through Friday with detour routing provided.

SEQUIM WELCOMES YOU

Each property owner will be notified prior to the closure of their section of West Alder Street. We will work with each property owner to maintain open parking areas, driveways and walkways.

The West Alder Street project will start at the North 5th Ave. and West Alder Street intersection and work east to North Sequim Ave.

The Public Works Department will provide continued assistance during this project to the school, home owners and travelers needing to get to and from the project area.
